

## ASX ANNOUNCEMENT

15 November 2013

### Supply of Gas Compression Packages

Engenco Limited (ASX:EGN) (**Engenco** or **Company**) is pleased to announce the receipt of an order to supply Santos Limited with three wellhead compression packages to the value of \$2 million for their Cooper Basin gas gathering operations.

Santos is a leading oil & gas exploration and production company in Australia and Asia with a strong growth project portfolio. Engenco subsidiary, Drivetrain Australia, has been working closely with Santos to differentiate and customise our compression solution.

The compressors have been specified to conform to Australian standards and customer requirements. They are to be packaged in North America by Sage Energy Corporation (with whom Drivetrain has a collaborative agreement). The compressors are to be shipped to Drivetrain's North Rocks facility for final inspection prior to delivery, installation and commissioning.

Each wellhead compressor will be a Caterpillar powered, oil flooded screw style unit based on a standard Sage design modified to Santos requirements. The compressors will each be located at conventional gas wells and have been designed with an extensive amount of instrumentation and automated control devices to ensure safe and reliable operation at the remote locations.

“The compression package supply and installation project is expected to be completed by the end of FY14 and will be an important reference site for our gastrain business,” said Engenco Managing Director, Ross Dunning.

#### *About Engenco Limited*

Engenco (EGN) specializes in:

- Maintenance, repair and overhaul of heavy duty engines, powertrain and propulsion systems
